

### **Bibliography Section Action Plan 2012-2013**

The activities of the section are very much focused on national bibliography advocacy and in particular the impact of digital publishing. Thus, the action plan is very much in alignment with the IFLA key initiative: *A programme advocating the role of libraries in providing digital access to content in their communities.*

The nature of the section activities is a mix of documentation, guidelines, knowledge sharing and papers/presentations.

We believe that supporting the library community's transition into a networked environment with metadata is crucial. Furthermore that national bibliographic metadata should be openly accessible. This is reflected in the action plan and has a clear link to the IFLA key initiative 1 Digital Content Programme.
