HISTORICAL NEWSPAPER LIBRARY

Main page Browse Search Advanced search Article index Feedback

You are welcome to investigate the history of Finland as seen in its historical newspapers!
The National Library has digitized the main part of the newspapers published in Finland 1771-1900.
The Newspaper Library contains approximately 1.7 million pages.

Newspapers published today 150 years ago: 08.07.1863

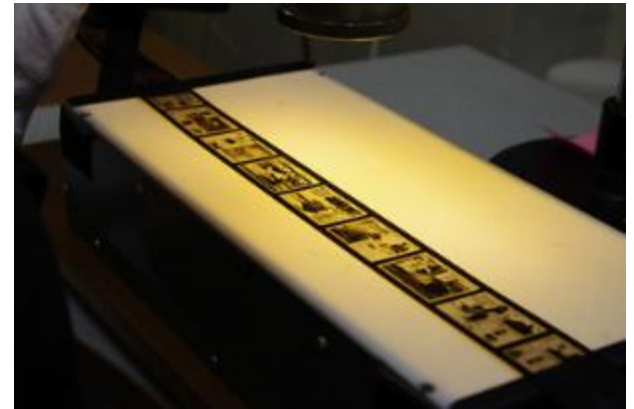

- [Finlands Allmänna Tidning](#)
- [Helsingfors Dagblad](#)
- [Lännetår](#)
- [Folkvännan](#)

[Frequently asked questions](#)

A historical newspaper clipping from 1882, featuring the text "vuonna 1882 neljäs vuosikerta" and "SAWO. Sawa, tietoja pohjois-ilmestyn tulewanafin wuon". A large "N:o 1." is overlaid on the clipping.

The Development towards the Digital Newspaper Handling Process 1

- **Now:**
 - Microfilming of all the Finnish newspapers, delivery to libraries both in Finland and abroad

The Development towards the Digital Newspaper Handling Process 2

- **Soon:**
 - Accelerating the handling of newspapers considerably
 - Enabling even more high-quality long-term preservation both on microfilm and in a digital format
 - A new digital newspaper process including the technical production environment, software and servers

The Digital Deposit System

- **The newspaper publishers**
 - The module for the automatic digital deposit of newspapers

The newspaper publishers deliver

- the print-PDF files and
- the associated metadata daily to the Library, including the metadata

Reception

- **The National Library of Finland**

The electronic reception (quality) control system was built in-house

- The features could be implemented fully based on the process workflow
- Agile methodology, gaining from the experiences, comments and feedback of the permanent staff

Computer Output Microfilm (COM)

- **The long-term preservation**
- The microfilms produced estimated to last at least 500 years
- The microfilming of printed newspapers replaced by the COM conversion in the process
- The optimisation of quality and workflow

The interface

- In the future the newspaper history can be discovered via the same interface: digi.nationallibrary.fi
- Eventually the old digitised newspapers and the digitally deposited newspapers form a digital entity without comparison

The screenshot shows the 'National Library DIGITAL COLLECTIONS' website. The navigation bar includes 'Frontpage', 'Newspapers', 'Ephemera', 'Journals', and 'Other databases and online resources'. The main heading is 'HISTORICAL NEWSPAPER LIBRARY'. Below this, there are links for 'Main page', 'Browse', 'Search', 'Advanced search', 'Article index', and 'Feedback'. The 'Titles' section contains a list of newspapers with their respective years and 'Info' links. The list is organized in two columns.
